## **DETAILED ACTION**

### ***Allowable Subject Matter***

Claims 1-13, 16-17, and 19-22 are allowed.

Claims 1-13 and 16-17, 22 are allowable over the prior art of record, none of the prior art whether together singularly or in combination to teach the claimed combination as recited. The closest reference "Systematic Design of Fuel Cell Powered Hybrid Vehicle Drive Train", by Gao et al. does not disclose or suggest the improvement of the instant application comprises a capacitor temperature detecting means that detects a temperature of the capacitor for setting a maximum power for the capacitor for charging and discharging the capacitor to compute a motor power limit value based on output power of the fuel cell and the capacitor maximum power and a real power of the drive motor for controlling an amount of real power applied to the drive motor such that the real power of the motor is equal to or less than the motor power limiting value so as to meet the power demand while maintaining/regulating the energy level of power sources of fuel cell and/or capacitor in a fuel cell vehicle. Gao et al. neither teach nor suggest a capacitor temperature sensor to detect a temperature of the capacitor in controlling an amount of real power applied to the drive motor based on the amount of the power generated by the fuel cell and the capacitor.

The reason for allowance of the claims 19-21 is the inclusion of setting the capacitor maximum power value based on a temperature of the capacitor in generating power with the fuel cell and controlling an amount of real power applied to the drive motor based on the amount of the power generated by the fuel cell and the capacitor maximum power value.

Art Unit: 2863

Gao et al. neither disclose nor teach the step of setting the capacitor maximum power value based on the temperature of the capacitor.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
